

Rehabilitation of the Taif Meteorological Office and plans to develop services in the governorate

The CEO of the National Center of Meteorology, Dr. Ayman bin Salem Ghulam, inaugurated today (Wednesday) the Taif Observatory after completing its rehabilitation work, as part of the center's efforts to develop the observatory system and raise the efficiency of its performance to serve the beneficiaries.

During his inspection visit, Dr. Ghulam was briefed on the readiness of the monitoring and operation systems, stressing the importance of enhancing the efficiency of outputs according to the highest technical standards to support monitoring and analysis operations, in a way that contributes to improving the quality of weather forecasts and weather phenomena in the region.

During the visit, he also held a meeting with the Observatory's employees, during which they reviewed the most prominent targets of the next phase, technical and operational development plans, and the level of performance in the relevant indicators, stressing the importance of integration between field and technical teams to achieve the maximum benefit from meteorological data to serve the community and the concerned authorities.
