

The Center celebrates its achievements in a Ramadan evening

The National Center of Meteorology (NCM) held its annual ceremony today in the presence of His Excellency the CEO of the center, Dr. Ayman bin Salem Ghulam, and the center's leaders and employees, in celebration of the achievements of the past year, and in appreciation of the efforts of employees and partners who contributed to achieving successes.

The ceremony witnessed a visual presentation that reviewed the most prominent achievements of the center during 2024, in addition to highlighting the Kingdom's role in the field of meteorology, coinciding with the celebration of World Meteorological Day.

In his speech, the CEO stressed the importance of this meeting to enhance the spirit of the team, and continue working to achieve the Center's strategic goals, pointing to the achievements achieved during the past year thanks to the efforts of the Center's employees and the cooperation of partners, and stressing the Center's commitment to developing the meteorological system in accordance with the Kingdom's Vision 2030

The ceremony included honoring distinguished departments, partners and customers, in addition to honoring prominent offices and observatories that have performed well during the past year, and celebrating the 14th anniversary of the launch of the early warning system, in recognition of the role it played in enhancing the Kingdom's readiness to deal with various weather phenomena.

At the end of the ceremony, the CEO thanked all the work teams that contributed to the success of the center, and the supporting entities that strengthened the effective partnership, stressing the importance of continuing to achieve the successes and excellence of the center's employees, and working in a team spirit to continue upgrading meteorological services, and enhancing the center's readiness to face climate challenges in accordance with the best international standards
